Summary

Product-minded Full-Stack Software Engineer specializing in architecting, scaling, and operating high-impact SaaS platforms using TypeScript, Next.js, and Node.js/NestJS. Proven track record as technical anchor at a fast-paced startup—mentoring 9 engineers, leading pre-sales demos, and owning systems end-to-end. Slashed query latency by 77% (35s to 8s), cut token costs by 80%, built air-gapped on-premise AI deployments for government clients, engineered universal data pipelines across 20+ databases, and managed cloud/VPS CI/CD.

Experience

Software Engineer – Core Systems | Apex Experts AI Solutions *May 2025 – Present*

- Served as core engineering anchor across flagship SaaS products (MyQuery.AI, Asklyze), mentoring 9 engineers on architecture and clean code while coordinating deliverables with international contractors across global timezones (US, GMT+11).
- MyQuery.AI Architecture & Optimization:** Architected an enterprise AI analytics platform serving 200+ active users; slashed end-to-end report generation latency from 35s+ to approx. 8s (77% reduction) and cut token consumption by 80% via semantic caching and context chunking.
- Air-Gapped Enterprise Edition (UAE Gov):** Built a self-hosted, containerized on-premise edition bundling local AI models (GPT-OSS, BGE-M3, Whisper STT) with asymmetric offline licensing; deployed to an active UAE government entity.
- Universal Enterprise Data Connectors:** Engineered schema introspection and connection pooling across 20+ SQL/NoSQL databases, spanning modern cloud warehouses (Snowflake, ClickHouse) and legacy systems (IBM Db2, Informix, Oracle).
- APEX eInvoicing Platform:** Architected a NestJS on-premise integration platform connecting ERPs (SAP, Oracle) to the Egyptian Tax Authority (ETA), with PKCS#11 cryptographic hardware token signing and BullMQ/Redis retry queues.
- Technical Pre-Sales & Internal Ops:** Delivered technical architecture walkthroughs to enterprise prospects, and built company-wide internal CRM, ERP, and attendance tools in Next.js using AI-accelerated workflows.

Freelance Full-Stack Engineer | Y-Verify Audit & Compliance *July 2025 – Sept 2025*

- Delivered an AI-assisted compliance management platform for 500+ operators; integrated Google Maps APIs for geospatial verification, Supabase (Auth, RLS, Storage), and client schema form engines (React Hook Form, Zod).
- Engineered role-based access control (RBAC), multi-tenant policies, and automated audit export pipelines.

Freelance Full-Stack Software Engineer | Self-Employed / Remote Clients *Aug 2024 – April 2025*

- HoxDEX:** Built a crypto tracking platform in Next.js with CoinGecko APIs and a Redis caching layer to eliminate API rate limits.
- Shahbandar Seeds (shahbandar.biz):** Delivered a multilingual Next.js corporate platform (Arabic, English, French) with native Right-to-Left (RTL) typography, i18n architecture, and responsive UI for international agricultural clients.

Featured Projects

Trseah AI Proposal Studio | Saudi Government Etimad Integration *2026*

- Delivered an end-to-end tender proposal platform in a 14-day sprint (Next.js, NestJS, FastAPI, LangChain); integrated Saudi Etimad APIs, multi-document PDF RFP parsing, approval billing workflows, and an AI studio generating designed PDF proposals.

Rewaa Education Management | Multi-Tenant Platform *2026*

- Architected a multi-tenant platform (Next.js, Node.js, PostgreSQL/Supabase) with concurrency-safe booking transactions, student payment verification, and Dockerized VPS deployment with zero-downtime CI/CD.

Technical Skills

Languages & Core: TypeScript, JavaScript (ES6+), SQL, Python, Go, Java, C, HTML5, CSS3

Frontend: React, Next.js (App & Pages), Tailwind CSS, shadcn/ui, Redux Toolkit, TanStack Query, RTL/LTR i18n

Backend: Node.js, NestJS, Express.js, FastAPI, RESTful APIs, GraphQL, WebSockets, BullMQ, Redis, Prisma, Drizzle, Django

Databases & Storage: PostgreSQL, Supabase (Auth, DB, Storage), Redis, ClickHouse, MySQL, Snowflake, MongoDB, SQLite

Cloud, DevOps & AI: Docker, Docker Compose, Linux VPS, Google Cloud Run, NGINX, GitHub Actions CI/CD, Air-Gapped AI, LangChain, OpenAI, Gemini

Education

Alexandria University, Egypt | B.Sc. in Communications and Electronics Engineering *Sept 2019 – June 2024*
